

Asset Tracking

Without Infrastructure, IT, or Overhead

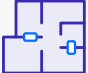

Fully managed. Wire-free.
Deployed in hours.

You can't manage what you can't see.

- Staff waste hours searching for equipment
- Assets sit idle or go missing
- Over-purchasing and rentals increase costs
- No reliable system of record

Easy installation. Get started in minutes.

- 1  Place battery-powered anchors anywhere
- 2  Tag assets and sensors within minutes
- 3  Data streams instantly to the cloud

No infrastructure. No burden. No tradeoffs.

-  No Long Installs
-  No Construction
-  No Wires or Cables
-  No Capital Expense
-  No IT Involvement
-  No Servers or Wi-Fi

No configuration. No downtime. No delays.

A network **built for operations**—not IT.

Secure 4G/LTE connectivity

No hospital Wi-Fi dependency

Fully managed by EdgeX

Our Secret Sauce
The Patented EdgeX Network.
100% Wire-Free.

Designed for how facilities actually run

- Track any asset, not just high-value equipment
- Extend coverage instantly with additional anchors
- Scale from a single department to enterprise-wide
- Monitor activity continuously, 24/7

What you gain

- Real-time visibility across your facility
- Full audit trail with location, date, and time
- Smart alerts with escalation workflows
- Automated reporting and insights

From zero to live in hours

- No IT coordination required
- No network configuration
- No infrastructure planning
- No disruption to operations

Outcomes for your facility

Find equipment within seconds

Reduce search time across every shift

Improve utilization of existing assets

Reduce unnecessary purchases and rentals

Where traditional RTLS requires infrastructure, **EdgeX removes it entirely.**

See how fast you can eliminate search time.
