

Environmental Monitoring Without Infrastructure, IT, or Manual Work

Fully automated. Wire-free.
Deployed in hours.

Manual monitoring creates risk.

- Staff spend hours logging data information
- Alerts are delayed or missed entirely
- Gaps in documentation put compliance at risk
- Systems rely on IT, and infrastructure

Easy installation. Get started in minutes.

1 Place battery-powered anchors anywhere

2 Tag assets and sensors within minutes

3 Data streams instantly to the cloud

No setup. No disruption. No manual processes.

No infrastructure. No manual logging. No gaps.

No Long Installs

No Construction

No Wires or Cables

No Capital Expense

No IT Involvement

No Servers or Wi-Fi

A network **built for compliance**—not IT.

Secure 4G/LTE
connectivity

No hospital Wi-Fi
dependency

Fully managed
by EdgeX

Our Secret Sauce
The Patented EdgeX Network.
100% Wire-Free.

Built for Compliance: Designed for regulated environments

- Eliminate manual logging and human error
- Maintain continuous records for audits
- Ensure compliance with national standards
- Provide accountability across teams

What you gain

- Constant, automated environmental monitoring
- Full audit trail with time-stamped records
- Real-time alerts with escalation workflows
- Automated reporting for compliance

From zero to live in hours

- No IT coordination required
- No network configuration
- No infrastructure planning
- No disruption to operations

Outcomes for your facility

Eliminate manual temperature logs

Detect issues immediately

Reduce compliance risk and audit stress

Protect critical samples and environments

Where traditional monitoring depends on people and infrastructure, **EdgeX automates it completely.**

See how fast you can automate compliance and eliminate manual monitoring.
